IMRAT SINGH LODHI

Data Science | Machine Learning | AI Developer

Bhopal, Madhya Pradesh | 9691289574 | imratsinghlodhi02@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI Developer and Data Scientist with hands-on production experience building AI-driven automation systems and end-to-end data science pipelines. Skilled in Python, SQL, Pandas, NumPy, Machine Learning, Deep Learning, and n8n workflow automation. Built a customer churn analytics pipeline achieving ~77% accuracy across three model types. B.Tech Computer Science graduate (RGPV, 2026) seeking full-time roles in Data Science, Machine Learning, and AI Development.

PROFESSIONAL EXPERIENCE

AI Developer Intern — CodeGrameen *March 2026 – Present*

Rewari, Haryana, India · On-site

- Built an end-to-end Customer Churn Analytics pipeline on 2,000+ SQL customer records, using Python (Pandas, NumPy) for cleaning and processing and Matplotlib/Seaborn for 6 exploratory visualizations to uncover churn patterns.
- Built and compared 3 predictive models (Logistic Regression, Random Forest, Deep Learning/TensorFlow-Keras) achieving ~77% accuracy; identified customer tenure and support call frequency as the strongest churn drivers.
- Developed a WhatsApp-based order management automation system for a bakery client using n8n, Google Sheets, and the WhatsApp Business API, handling order confirmations, rejections, review requests, and promotional offers end-to-end.
- Built n8n automation workflows for real estate lead communication and follow-ups, and for scheduling and publishing Facebook and Instagram posts.
- Applied LLM-based prompt engineering and API integrations across automation systems, including end-to-end testing before deployment.

PROJECTS

Customer Churn Analytics — End-to-End Data Science Project — GitHub *Aug 2026 – Sep 2026*

Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow/Keras

- Generated and stored 2,000+ customer records in a SQL database; cleaned and processed data using Pandas and NumPy.
- Created 6 visualizations analyzing churn distribution, spend patterns, tenure impact, and feature correlations.
- Compared 3 models: Logistic Regression (77.25%), Random Forest (76%), Deep Learning (77.25%) — delivering insights to support data-driven retention strategy.

Netflix Movies Data Analysis — GitHub *Feb 2026 – Mar 2026*

Python, Pandas, Matplotlib, Seaborn

- Cleaned and preprocessed a real-world Netflix content dataset, handling missing values and inconsistent formatting.
- Performed exploratory data analysis across genre, release year, and content ratings; built visualizations to communicate key trends.

TECHNICAL SKILLS

Programming: Python, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)

Data Science & Analysis: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Data Visualization

Machine Learning & Deep Learning: Supervised & Unsupervised Learning, Regression, Classification, Neural Networks (TensorFlow/Keras)

Statistics: Descriptive & Inferential Statistics, Hypothesis Testing (t-test, Z-test, Chi-Square), Correlation & Regression Analysis

AI / Automation: Large Language Models (LLMs), Prompt Engineering, AI Chatbot Development, n8n Workflow Automation

Databases: SQL, MySQL

Tools & Platforms: Jupyter Notebook, VS Code, Git & GitHub

EDUCATION

B.Tech, Computer Science and Engineering — RGPV, Bhopal *Jun 2022 – Jun 2026*

CGPA: 7.67 | First Division with Honours

Class XII (MP Board), Vivekanand High School, Sakha, Damoh — 81.1% | 2022
Class X (MP Board), Vivekanand High School, Sakha, Damoh — 70% | 2020

ACHIEVEMENTS

- Consistent practice of Data Structures & Algorithms to strengthen problem-solving and coding proficiency.
